

From Editor's Desk

It is indeed a pleasure to present before our readers the inaugural issue of Annals of Applied Bio-Sciences (AABS); an open access, peer reviewed, international, online Journal. It is a matter of great achievement to reach this milestone in such a brief time, all thanks to our esteemed editors, reviewers and wide audience who have provided us with their valuable work.

The journey so far has been very enriching and satisfying. Within a short span of three and half months of its inception (AABS was launched on 11th April 2014), Annals of Applied Bio-Sciences has marked its presence internationally. Audience from all across the world has visited the Annals of Applied Bio-Sciences Journal site, giving it a truly international character. Submissions have been received from affiliated of premier institutes from across the countries, thus vindicating our philosophy of making Annals of Applied Bio-Sciences a premier reference journal in its category

At Annals of Applied Bio-Sciences, we make all efforts to reduce the turnaround time of article publishing process to the shortest possible, without compromising with the quality of peer review process.

Annals of Applied Bio-Sciences is really fortunate to have some of the brightest academicians of this field in its panel of reviewers, who have painstakingly reviewed the articles, submitted by the most scientific oriented minds of the society, and constantly motivated us with their prompt response to the requests for review and quick correspondence during the review process.

I would like to thank our esteemed Editorial Board and our Advisory Editors, who did the preliminary screening of the papers submitted with Annals of Applied Bio-Sciences. We thank them for their precious feedback and valuable advice.

Through our team of acclaimed editors and reviewers, we have tried to maintain high standards of quality and academic excellence in our published articles. Without their efforts and interest in this Journal, we could not have achieved such brief turnaround time for processing of our articles. The current average turnaround time for first screening by the editors and the review by our esteemed reviewers is one of the shortest in the industry and I believe any time lesser than that cannot be possible without compromising the quality of the review.

I would also like to thank the authors, who have provided us their valuable research for publication in the inaugural issue of Annals of Applied Bio-Sciences. Without their active contribution, we would not have been in a position to celebrate this momentous milestone.

Many thanks are also due to our peers and international audience. Their trust and worthy encouragement for our journal has been overwhelming motivating.

I would like to particularly thank the publishers, Pacific Group of e- Journals (PaGe) and specially Dr. Bhupendra Pushkar, the Editor-in-Chief (Annals of Applied Bio-Sciences), for their painstaking work, that we managed to bring out our first issue within three and half months of setting up the Journal.

The Way Ahead:

Annals of Applied Bio-Sciences has already obtained the ISSN number (ISSN NO: 2349-6991) and is in the process of getting itself indexed with the major databases of the world. I welcome your comments and suggestions on Annals of Applied Bio-Sciences and as it's Co-Editor-in-Chief, I am fully committed to make Annals of Applied Bio-Sciences (AABS) a reference journal in the field of applied Bio-Sciences. For this I would request the authors to submit more of original research work than case reports or letters. It will help improve the stature of the Journal and credentials of the authors.

Dr. Sompal Singh,
Co-Editor-in-Chief
